OFFICE PHONE 541-372-3540  
FAX 541-372-2437

## Aquatic and Right-of-Way herbicide applications Chemical Notification Request Form

To participate in the Chemical Application Notification Program Owyhee Irrigation District must be informed as to the wishes of the water user. This form is your notification to the District as to what action you desire Owyhee Irrigation District to take on your behalf.

Not all chemicals that are used to control aquatic vegetation in the District will be fish friendly.  
When Cascade is applied at label rates it is " Fish Friendly" .

### Reason for this program request:

- I have a fish pond.
- I wish to be organic.
- I have a lawn that is flood irrigated. (Xylene only)
- I have a family member that is allergic to spray
- I have dairy livestock.
- I wish to know when chemicals are used

### Request that the District take this action on my behalf:

- Notification only
- Lock & Close my head gate when applying aquatic chemicals
- My dairy livestock have no access to irrigation water. No notification needed.
- Don't spray the District's right-of-way. (Land owner will be responsible for weed control at Districts discretion)
